Use appropriate SQL functions to solve following queries.

Note: To solve below queries, use “hr” database

1. Display all the first names in lower case and the last names in upper case as the single column separated with ' - '. Provide the meaningful name to the column.

```
d6_96728_shaurya> select concat(LOWER(FIRST_NAME),"-", upper(LAST_NAME)) as
`Full_name`FROM employees;
+-------------------+
| Full_name         |
+-------------------+
| ellen-ABEL        |
| sundar-ANDE       |
| mozhe-ATKINSON    |
| shelli-BAIDA      |
| amit-BANDA        |
| elizabeth-BATES   |
```

2. Display the first word of the job title. (Hint : Use substring_index).

```
d6_96728_shaurya> SELECT SUBSTRING_INDEX(JOB_TITLE, ' ',1) FROM jobs;
+-----------------------------------+
| SUBSTRING_INDEX(JOB_TITLE, ' ',1) |
+-----------------------------------+
| Public                            |
| Accounting                        |
| Administration                    |
| President                         |
| Administration                    |
| Accountant                        |
| Finance                           |
| Human                             |
| Programmer                        |
| Marketing                         |
| Marketing                         |
| Public                            |
| Purchasing                        |
| Purchasing                        |
| Sales                             |
| Sales                             |
| Shipping                          |
| Stock                             |
| Stock                             |
+-----------------------------------+
19 rows in set (0.009 sec)
```

3. Display the First name, last name and length of first name for the employees whose last name contains character ‘b’ anywhere after 3rd position.

```
d6_96728_shaurya> SELECT first_name, last_name, LENGTH(first_name)
    -> FROM employees
    -> WHERE last_name LIKE '___%b%';
+------------+-----------+--------------------+
| first_name | last_name | LENGTH(first_name) |
+------------+-----------+--------------------+
| Gerald     | Cambrault |                  6 |
| Nanette    | Cambrault |                  7 |
| Nancy      | Gruenberg |                  5 |
| Susan      | Jacobs    |                  5 |
+------------+-----------+--------------------+
4 rows in set (0.041 sec)
```

4. Display the employee id, first name and last name of the employees whose first or last name includes a space in between.

```
d6_96728_shaurya> SELECT employee_id, first_name, last_name
    -> FROM employees
    -> WHERE first_name LIKE '% %'
    ->    OR last_name LIKE '% %';
+-------------+-------------+-----------+
| employee_id | first_name  | last_name |
+-------------+-------------+-----------+
|         112 | Jose Manuel | Urman     |
+-------------+-------------+-----------+
1 row in set (0.007 sec)
```

5. Display first name, salary, and round the salary to thousands.

```
d6_96728_shaurya> SELECT first_name, salary, ROUND(salary,-3)
    -> FROM employees;
+-------------+----------+------------------+
| first_name  | salary   | ROUND(salary,-3) |
+-------------+----------+------------------+
| Steven      | 24000.00 |            24000 |
| Neena       | 17000.00 |            17000 |
| Lex         | 17000.00 |            17000 |
| Alexander   |  9000.00 |             9000 |
```

6. Display employee ID and the date on which he ended his previous job in the format as mentioned. (Format: Thursday, October 27th 2011)

```
d6_96728_shaurya> SELECT employee_id, DATE_FORMAT(end_date,'%W, %M %D %Y') AS previous_job_end FROM job_history;
+-------------+----------------------------+
| employee_id | previous_job_end           |
+-------------+----------------------------+
|         101 | Thursday, October 27th 2011  |
|         101 | Sunday, March 15th 2015      |
|         102 | Sunday, July 24th 2016       |
|         114 | Sunday, December 31st 2017   |
|         122 | Sunday, December 31st 2017   |
|         176 | Saturday, December 31st 2016 |
|         176 | Sunday, December 31st 2017   |
|         200 | Friday, June 17th 2011       |
|         200 | Saturday, December 31st 2016 |
|         201 | Tuesday, December 19th 2017  |
+-------------+----------------------------+
10 rows in set (0.006 sec)
```

7. Display first name and date of first salary of the employees. (Consider 1st day of month as salary day. HINT: LAST_DAY).

```
d6_96728_shaurya> SELECT first_name,
    -> LAST_DAY(hire_date) AS first_salary_date
    -> FROM employees;
+-------------+-------------------+
| first_name  | first_salary_date |
+-------------+-------------------+
| Steven      | 2013-06-30        |
| Neena       | 2015-09-30        |
| Lex         | 2011-01-31        |
| Alexander   | 2016-01-31        |
| Bruce       | 2017-05-31        |
| David       | 2015-06-30        |
| Valli       | 2016-02-29        |
| Diana       | 2017-02-28        |
| Nancy       | 2012-08-31        |
```

8. Display first name and experience of the employees in the format of number of years, months and days completed.

```
d6_96728_shaurya> SELECT first_name,
    -> TIMESTAMPDIFF(YEAR, hire_date, CURDATE()) AS years,
    -> TIMESTAMPDIFF(MONTH, hire_date, CURDATE()) % 12 AS months,
    -> DATEDIFF(CURDATE(), DATE_ADD(hire_date,
    -> INTERVAL TIMESTAMPDIFF(MONTH, hire_date, CURDATE()) MONTH)) AS days
    -> FROM employees;
+-------------+-------+--------+------+
| first_name  | years | months | days |
+-------------+-------+--------+------+
| Steven      |    12 |      9 |    1 |
| Neena       |    10 |      5 |   25 |
| Lex         |    15 |      2 |    5 |
| Alexander   |    10 |      2 |   15 |
| Bruce       |     8 |      9 |   25 |
| David       |    10 |      8 |   21 |
```

9. Display the employee id, first name and joining date of the employees who joined in the month of august of any year.

```
d6_96728_shaurya> SELECT employee_id, first_name, hire_date
    -> FROM employees
    -> WHERE MONTH(hire_date) = 8;
+-------------+------------+------------+
| employee_id | first_name | hire_date  |
+-------------+------------+------------+
|         108 | Nancy      | 2012-08-17 |
|         109 | Daniel     | 2012-08-16 |
|         119 | Karen      | 2017-08-10 |
|         129 | Laura      | 2015-08-20 |
|         134 | Michael    | 2016-08-26 |
|         152 | Peter      | 2015-08-20 |
```

10. Display the details of employees who joined before the year 2015.

```
d6_96728_shaurya> SELECT * FROM employees
   -> WHERE YEAR(hire_date) < 2015;
+------------+------------+----------+----------+---------------+------------+------------+----------+----------------+------------+---------------+
| EMPLOYEE_ID | FIRST_NAME | LAST_NAME | EMAIL    | PHONE_NUMBER  | HIRE_DATE  | JOB_ID     | SALARY   | COMMISSION_PCT | MANAGER_ID | DEPARTMENT_ID |
+------------+------------+----------+----------+---------------+------------+------------+----------+----------------+------------+---------------+
|        100 | Steven     | King     | SKING    | 1.515.555.0100 | 2013-06-17 | AD_PRES    | 24000.00 |           NULL |       NULL |            90 |
|        102 | Lex        | Garcia   | LGARCIA  | 1.515.555.0102 | 2011-01-13 | AD_VP      | 17000.00 |           NULL |        100 |            90 |
|        108 | Nancy      | Gruenberg | NGRUENBE | 1.515.555.0108 | 2012-08-17 | FI_MGR     | 12008.00 |           NULL |        101 |           100 |
|        109 | Daniel     | Faviet   | DFAVIET  | 1.515.555.0109 | 2012-08-16 | FI_ACCOUNT |  9000.00 |           NULL |        108 |           100 |
|        114 | Den        | Li       | DLI      | 1.515.555.0114 | 2012-12-07 | PU_MAN     | 11000.00 |           NULL |        100 |            30 |
|        115 | Alexander  | Khoo     | AKHOO    | 1.515.555.0115 | 2013-05-18 | PU_CLERK   |  3100.00 |           NULL |        114 |            30 |
```

11. Display the number of days between system date and 1st January 2011.

```
d6_96728_shaurya> SELECT DATEDIFF(CURDATE(), '2011-01-01') AS days_difference;
+-----------------+
| days_difference |
+-----------------+
|            5555 |
+-----------------+
1 row in set (0.006 sec)
```

12. Display number of employees joined after 15th of any month.

```
d6_96728_shaurya> SELECT COUNT(*) AS total_employees
    -> FROM employees
    -> WHERE DAY(hire_date) > 15;
+-----------------+
| total_employees |
+-----------------+
|              57 |
+-----------------+
1 row in set (0.095 sec)
```

13. Display third highest salary of employees.

```
d6_96728_shaurya> SELECT DISTINCT salary  FROM employees
    -> ORDER BY salary DESC  LIMIT 1 OFFSET 2;
+----------+
| salary   |
+----------+
| 14000.00 |
+----------+
1 row in set (0.042 sec)
```
